

# Clustering Report

## 1. Number of Clusters:

The KMeans algorithm grouped the customers into 3 clusters based on their purchasing behavior.

## 1. Number of Clusters:

The KMeans algorithm grouped the customers into 3 clusters based on their purchasing behavior.

## 2. Davies-Bouldin Index:

The clustering quality was evaluated using the Davies-Bouldin Index, which resulted in a score of 0.95. A lower score indicates better-defined clusters.
